

Detack Launches Cybersecurity Hub in Austin, Texas

Austin, Texas, 26 August 2024 – Detack GmbH is pleased to announce the incorporation of its US company, Detack Inc, in Austin, Texas. This expansion marks a significant milestone in Detack’s strategic growth plan, aimed at enhancing its service delivery and client engagement within the US market.

Widely recognized for its innovative approaches to IT security and vulnerability management, Detack offers an extensive selection of services including advanced penetration testing, security audits, and pioneering in-house developed solutions such as EPAS (Enterprise Password Analytics Solution). The Austin office will play a crucial role in offering localized support and tailored cybersecurity solutions to Detack’s growing client base across the United States.

“We are excited to establish a presence in Austin, an epicentre of technology and innovation,” said Detack GmbH Managing Director, Costin Enache. “This expansion not only strengthens our position in the US market, but also demonstrates our commitment to providing locally robust cybersecurity solutions to our clients”.

Austin, often referred to as ‘Silicon Hills’ due its thriving tech industry and a vibrant ecosystem of startups, established tech companies, and a wealth of talent, is the ideal location for Detack’s US operations. The city’s dynamic business environment aligns with Detack’s mission to deliver cutting-edge cybersecurity solutions and foster stronger, more resilient security postures for its clients.

Detack welcomes Sam Croley as the CEO of its US office. Sam is an esteemed cybersecurity expert with many years of experience in the industry.

“We look forward to contributing to Austin’s dynamic tech community and supporting businesses and organisations with our innovative security solutions,” said Sam. “Our goal is to help organizations strengthen their defences, protect their critical assets, and navigate the complexities of today’s cybersecurity challenges.”

With the opening of the new Austin office, Detack is excited to provide its patented Enterprise Password Analytics Solution (EPAS) to US clients. This solution has been instrumental in strengthening the cybersecurity infrastructure of businesses worldwide, and its availability in the US market will help corporations enhance their security protocols with cutting-edge technology.

Additionally, EPAS will provide much needed technology for specific cryptographic applications in law enforcement and defense. The Austin office will also offer dedicated support to Detack’s established clients in the region, ensuring they receive prompt, expert assistance tailored to their unique security needs.

For more information about Detack and its services, including local support and inquiries about EPAS, please contact:
